CARDIO

Our range of cardiovascular products aims to cater to the needs of all users in all types of facilities. While traditional CV machines like treadmills, bikes, cross trainers are still a key part of a gym's offering, we have seen increased demand for HIIT cardio products. Items falling into this category include air bikes, rowers, curved treadmills and other unique pieces of equipment.

INTENZA 550T SERIES TREADMILLS

Because walking, jogging and running are the most instinctive forms of movement for most people, treadmills find themselves at the heart of many fitness facilities and are widely used by exercisers of all fitness levels.

Awarded 2014 Fitness Tribune Design Award, the 550Te Treadmill has earned the reputation of being high calibre cardio equipment. The 550T Series merges stunning design and smart technology with the entertainment and performance features exercisers demand.

The eye-catching design of the 550T Series blends artistic lines and the long-lasting beauty of aluminium elements with today's must-have technology creating a line of cardio products truly for the 21st Century.

Features

- Intenzacast (mobile mirroring)
- 19-inch Capacitive Touch Display
- Analogue and Digital TV
- Virtual Scenery - explore beautiful scenery from all over the world
- InCare™ 2.0 via USB
- Available with the Entertainment Series Console as well as the Interactive Series Console.

INTENZA 550E SERIES ELLIPTICAL

A good elliptical should be solid, easy to operate and feel natural to use. The 550E itself mimics the body's natural movements smoothly and gracefully while keeping workouts fresh and exciting with a robust offering of custom programs. Connectivity with a variety of tablets and smartphones enables exercisers to listen to their own playlists or watch their favourite shows on the full-colour touchscreen monitor.

Because of their popularity, elliptical trainers receive a great deal of daily use, therefore, must be superbly built. The 550ETi is built to sustain performance and appearance, day in and day out, keeping exercisers satisfied and coming back for more.

Features

- 16-Inch Capacitive Touch Display
- Robust frame structure is engineered for longevity and durability
- Intenzacast (mobile mirroring)
- InCare™ via Internet
- Self-powered, 3-phase, hybrid generator and belt drive system
Belt drive delivers smooth and quiet motion to foot pedals and handlebars
- Available with the Entertainment Series Console as well as the Interactive Series Console.

INTENZA 550UB SERIES UPRIGHT BIKES

The 550Ube2 merges stunning design and smart technology with the entertainment and performance features exercisers demand.

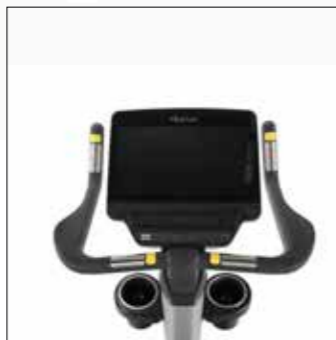

Biking provides a no—impact workout powered by pedalling, a motion very familiar to many people, making it very easy to perform properly. Also, as our population ages, this form of exercise is an important option for exercise facilities to provide because of its low risk of strain or injury.

Upright exercise bikes allow for a variety of movement, such as riding while standing or in a racing position, so multiple muscle groups can be exercised as a biker changes position. Plus, users with conditions such as spinal stenosis or osteoarthritis may find the forward-leaning position on the upright bike to be most comfortable compared to that of a recumbent bike.

The Intenza 550 UBe is designed for ease of getting on and off the bike, includes precise seat adjustments, and adjusts to 40 resistance levels – the most in the industry.

Features

- Robust frame structure ensures strength and durability
- 154 lbs. (70 kg) total weight provides stable, comfortable workouts
- Mimics the frame height and saddle-style of a road bike.
- Equipped with sturdy wheels allowing safe and easy relocation within the facility
- Available with the Entertainment Series Console as well as the Interactive Series Console.

INTENZA 550RB SERIES RECUMBENT BIKES

Recumbent bikes can be ideal for people who struggle with upright bikes. Those with lower back issues, neck pain, reduced neck mobility, or other physical limitations may find recumbent bikes to be a comfortable and sustainable way to maintain their cardio goals. This bike option can also place less stress on wrists and elbows.

The recumbent's step—through design creates a very low-profile seat and frame eliminating the need for exercisers to lift their legs when lowering into the seat. Ideal for those with limited mobility who still desire a cardio workout.

Value comes from strong construction, Simple to use, Easy to maintain. Exercisers find value in those things as well as these: Intuitive controls, comfortable, natural workouts, personalization and program variety.

Features

- Bottom bracket assembly with precision sealed ball bearings sustain, already exceptionally smooth, performance
- Ergonomic seat back designed with ventilation, lumbar support, and saddle provides long-lasting comfort and positioning for even the most rigorous workouts
- Accommodates users weighing up to 181kg (400lbs)
- Incremental seat adjustment accommodates exercisers from heights of 4'9" (147cm) to 6'5" (193cm)
- Available with the Entertainment Series Console as well as the Interactive Series Console.

INTENZA 550C ESCALATE STEP CLIMBER

For over 20 years, climbing exercisers have been regaled as one of the most efficient ways to build lower body strength and enhance cardio respiratory fitness. The benefits are undeniable, but the target demographic has always been limited. Until now. Introducing the Intenza Escalate 550™ Series, the world's first-ever adjustable-step-height climber.

The Escalate 550™ Series Climber opens up the world of climbing exercise to users at every fitness level. The revolutionary Smart StepHeight Technology allows users to choose between 20 unique step-height variations.

Whether you want to regain joint flexibility post-surgery, ease back into a workout routine, or push yourself to your physical limits, the 550Ce2 lets you fine-tune the intensity of your workout to align with your unique cardiovascular and range-of-motion goals.

Features

- Intenza's Smart StepHeight technology means users can choose between 20 unique step-height options.
- Produced with our planet and our employees in mind, the Escalate 550 Series Climber meets ErP standards and gives peace of mind to end users and facilities alike.
- Provides proactive machine diagnostics via Wi-Fi connection, allowing real-time updates and alerts.
- Available with the Entertainment Series Console as well as the Interactive Series Console.

STAR TRAC 8 SERIES TREADMILL

When designing the new 8-TRx, we started with the most solid foundation you could have – more than 20 years of treadmill superiority. And while most would have been content in making subtle improvements to an already proven design, we set out to create the ultimate marriage of user experience, benefits, desires and features ever put under foot. The result is nothing short of impressive

- Easily accessible Hot Bar® is located closer to the user with one finger speed and elevation controls, integrated stop button and contact heart rate grips.
- Star Trac Coach® provides over 1 million possible workouts ensuring a different workout, every time.
- Soft Trac® triple cell cushioning system provides maximum shock absorption making the entire deck a sweet spot.
- 20% max incline | 15 mph max speed.
- Lighter weight aluminium frame.

STAR TRAC 8 SERIES RECUMBENT BIKE

Easy and comfortable. How do you improve on an already great recumbent bike experience? You make it as comfortable as a great chair. You start by making sure it features the same Morse Taper bottom bracket and pedal system that is unique to Star Trac bikes. That's exactly what Star Trac did. Then, they kept going with a modern iconic design offering the industry's most comfortable back rest, a walk-through frame design, heart rate bar and adjustable reading station, dual-platform pedals and Star Trac's signature personal fans. The result– a recumbent bike that's the coolest looking and feeling ride on the floor.

- Dual platform with ratcheting straps provide users with the option for a secure hold or a strap-free platform workout
- Star Trac's popular personal fans create a more rewarding workout
- Improved shroud design to ease service
- Armrests alleviate tension in the shoulders and allow for a more relaxed posture
- Telescoping hand grips adjust to fit every user and allow access to the contact HR.

SPEEDFIT CURVED TREADMILL

The SpeedFit's new way of running helps you burn fat and calories faster and more efficiently than any other fitness concept to date with its innovative toe running approach. It is the same basic concept used in the training of a sprinter for a 100, 200, 400 meter dash. Landing on the ball of your feet pushes your body forward and uses more muscle groups at one time than the traditional heel strike first method used by many runners.

- No bounds, no controls, just get on and run.
- No electricity required – Completely powered by the user.
- Reduces joint impact and improves running performance.
- Innovative curved treadmill design conforms better to your stride.
- Smooth and quiet belt drive system with zero maintenance requirements.

PRODUCT CODE	ITEM	PRICE
TB1-SPT100C	Speedfit Curved Treadmill	£6,598.90

CYBEX SPARC

Lose fat. Build muscle. Gain strength. Increase metabolism. Improve power. SPARC does it all, more safely, because it's biomechanically refined – providing exceptional results with low stress. The SPARC is ideal for adding to your functional, suspension and training zones as well as adding something new to boot camp, cross training and other small group classes. Biomechanically engineered to be gentler on joints, the product encourages users to work harder by minimising their perceived exertion.

- Fan as primary resistance
- Two modes of operation: Circuit Mode & Interval Mode
- Manually controlled incline set at three positions
- Uniquely designed to reduce strain on knees
- Additional resistance mechanism offers resistance at slower strides

CONCEPT2 ROWING MACHINE

The Concept2 Rower has been the industry's leading rowing machine for many years. Concept2 Rowers give feedback on distance, speed, time, power and calories burned. Rowing offers a full body workout so is considered one of the most intense and gruelling forms of cardiovascular exercise.

- The PM5 Performance Monitor contains an "ANT" chip for wireless communication with ANT heart rate equipment, and also for PC-less racing and future communications with a PC
- Automatic Operation: Just start to row and the monitor turns on and gives feedback. You don't have to push a single button
- LogCard: Removable LogCard stores workout data and personal preferences. A LogCard is included with every PM5
- Supports Machine to Machine Racing: has the computing power to support both wireless and wired racing. No PCs needed

JACOBS LADDER

Jacobs Ladder is a patented commercial cardio machine specifically designed for fitness enthusiasts, athletes and professionals and is one of the key pieces of fitness equipment used on “America’s Biggest Loser”.

Its unique design places the user at a 40° angle in order to take stress off of the lower back. Because Jacobs Ladder is self-paced, the faster you go, the faster it goes, in order to stop, just slow down. Jacobs Ladder is also self-powered, so without the need for an electrical outlet, you can place it anywhere in your facility.

- Choose your own pace - The faster you go, the faster the machine works.
- Self powered generator system - No need to use electrical outlet.
- 40 degree workout angle - Ideal for rehab from lower body and back injuries.
- Low impact workout - Less stress on joints when compared to other cardio machines.
- Feedback of elapsed time, feet climbed, speed and calories burnt through digital display.

PRODUCT CODE	ITEM	PRICE
NAF-JL	Jacobs Ladder	£6,249.00

VERSACLIMBER SPORT

The Versaclimber Sport provides the ultimate climbing-style training regime, designed to continuously engage both the upper and lower body in a zero-impact, high calorie burning workout.

IMPULSE EXOFORM

The new impulse Fitness ExoForm Commercial Fixed Resistance range offers gym members an efficient and comfortable workout, at excellent value for you.

Designed by an American team of fitness experts, this range of strength training equipment was built to be durable, comfortable and safe, while taking up minimal space on the gym floor.

Cage: Same assembling height 150cm, metal top cover.

Timer and counter: Standard configuration on all models.

Tube: 3mm tube for all models. Main structure use R40x133x3 tube makes appearance more strong and tough.

Plastic part: Injection molding for better quality.

Handle: Patented ergonomic design with TPU material.

Incremental weight: 5lbs for smaller adjustment.

Weight stack: 19mm full steel plate. Weight Options

Easy to enter and exit the machine and able to adjust when in sitting position.

Pad: Seat and back pads are made by moulded PU foam. Use anti-slippery surface and add protect cover on the back. Various colours to choose from.

Suitable for people from 145cm to 195cm.

Standard metal part: Nickle plated os stainless steel for better appearance and quality.

Diverging motion structure allows the arm training simultaneously and alternately.

Belt and cable: Use fabric belt inside the cage and USA LOOS cable outside the cage to improve longevity.

Pulley: Lathed pulley with less tolerance.

Bearing: Reliable Taiwan brand.

Confirm with EN957. Passed 300,000 times fatigue test and 100kg stable test.

ORIGIN POWER RACK & HALF RACK

The Origin lifting racks are essential pieces of equipment for any gym, allowing for many heavy lifting workout exercises.

The racks both feature 15 secure racking positions at 10cm apart. These allow for full height adjustments of the spotting bar attachments and the durable hook attachments. Keeping weight plates organised is easy with the five outer weight plates storage bars.

The incorporated power band attachments allow users to easily increase resistance, or assistance, without the need for extra weight plates. The featured pull up bars allow for pronated (palms facing away), supinated (palms facing body), and close grip pull ups – a small, but essential feature of any good rack.

DIMENSIONS	WEIGHT
Power Rack: 2442mm (H) x 1755mm (W) x 1960mm (D)	216kg
Half Rack: 2442mm (H) x 1747mm (W) x 1960mm (D)	153kg

PRODUCT CODE	ITEM	PRICE
IF-OF-PR	Origin Power Rack	£1,731.54
IF-OF-HR	Origin Half Rack	£1,346.53

REVOLUTION FITNESS

“

Working with Origin has made the project run far more smoothly than we could have hoped. Should we ever undertake a project similar to this one, we would always adopt the help of Origin. Origin would come highly recommended by us.

David Crawford

ORIGIN MULTI ADJUSTABLE BENCH

The Origin Multi-Adjustable Bench is ideal for any commercial gym or for home use. It's -10° to +80° (in seven steps) enable incline, flat, and decline workouts allowing users to target specific muscle groups.

The bench comes with black, high-quality upholstery, a silver, matt metallic frame, and the moving parts are identified clearly by a bold red metallic finish with yellow handles. The backrest of the bench is adjustable from -10° to +80° enabling decline, flat and incline exercises which allow users to work specific muscle groups, and specific muscles within those groups.

The seat has 5 levels of adjustment angling upwards giving more support as the backrest inclines. The bench comes with two transportation wheels and also has a large handle making relocation of the bench easy and safe. The bench also has feet covers which protect the bench and the floor from any damage.

DUNDEE AND ANGUS COLLEGE

“

Origin Fitness has consistently provided Dundee and Angus College with excellent customer service and support. From initial design concepts, identifying the specific equipment to meet the different needs of our users, to the instillation and ongoing support. Working in partnership with Origin fitness, we now have gyms that reflect industry standards and our learners, staff, and general customers are benefiting from these exceptional facilities.

Stephen McGregor
Head of Sports and Fitness
Dundee and Angus College

FREE WEIGHTS

Free weights training is a critical provision for almost all types of gym. At Origin Fitness we've developed our ranges of dumbbells, barbells, Olympic bars, plates and accessories in order to meet the diverse free weights requirements of our many clients.

With strength sports like Olympic Weightlifting, Powerlifting and even CrossFit continuing to grow in popularity, demand for exciting free weights spaces equipped with high quality barbells and bumpers hasn't been as high as it is now.

“

I had a very clear vision of what I wanted to achieve, and Matt worked with me to make this vision a reality. Origin Fitness provided all the equipment at a very competitive price, and I am very pleased with the work they have done. I would definitely recommend them to anyone looking to set up a new facility.

”

James Rivers

Gymbo's Health and Fitness

ORIGIN HEX RUBBER DUMBBELLS

The Origin Hex Rubber Dumbbells are sold as pairs and are made from solid steel handles with rubber covered ends. The hexagonal shape of the dumbbell eliminates rolling which in turn improves functionality and safety. The rubber coated ends helps to protect flooring, the dumbbell itself and any machines or storage racks.

Zhangkong are specialists in competition and Olympic style weightlifting equipment. All of their products are approved by the International Weightlifting Federation (IWF), meaning they meet certain specifications required for use in Olympic competition. Zhangkong equipment was used in both the Beijing and Rio Olympic Games and is renowned for its precision and accuracy. The competition style equipment is approved by the International Weightlifting Federation (IWF) for use in Olympic lifting. The training equipment, whilst not suitable for competition, is also extremely accurate in weight and dimension. The discs are all colour coded as per IWF specification.

ZKC

IWF COLOURED COMPETITION PLATES

The Zhangkong IWF Coloured Weight Plates are approved by the International Weightlifting Federation. These plates are made of steel and have a rubber coating as per IWF specifications.

The diameter of the largest disc is 450mm with a tolerance of ± 1 mm. The bore diameter is 50mm. There is clear indication of weight on both sides of the plates as per IWF specifications. Weights are durable and are able to withstand impact associated with Olympic lifting.

ORIGIN DROP-IN LANDMINE

The Origin Drop-In Landmine is an essential tool for any strength and mobility training programme. Due to its lightweight yet commercially durable design, it can be quickly put in to place and used with all standard Olympic weight plates. The two point rotation axis allows for dynamic full body movements, increasing ease of use and allowing for total body workouts.

- Will accommodate all Olympic size bars (50mm)
- Lightweight and portable
- Can be inserted into any Olympic size weight plate
- Rotates on two axis points enabling dynamic movement
- Sleek black powder coat finish

Bar and Plates not included

PRODUCT CODE	ITEM	PRICE
NTS-DILM	Origin Drop-In Landmine	£39.99

ORIGIN WEIGHT BAR HOLDER

Made of steel the Origin Weight Bar Holder can accommodate up to five Olympic size bars. The base also has two holes which allow the unit to be fixed to the floor. We recommend this to keep your weight bars safe and secure.

- Holds five Olympic weight bars
- Sleek steel finish
- Ideal space saving solution
- Dimensions: 265mm x 265mm
- Height: 210mm

Due to their uneven weight distribution, Hex bars or other speciality bars should not be stored in the Origin Weight Bar Holder.

PRODUCT CODE	ITEM	PRICE
NTS-WBH	Origin Weight Bar Holder	£71.28

ORIGIN WALL MOUNTED WEIGHT BAR RACK

The Origin Wall Mounted Weight Bar Rack is an ideal storage solution for all gyms. By storing bars horizontally, the bearings and fixings within the sleeves of the bars are saved from premature wear, while simultaneously reducing clutter on the gym floor.

The Origin Wall Mounted Weight Bar Racks can accommodate bars of all weights and sizes.

- Will hold up to three weight bars
- Keeps loose bars off the gym floor
- Storing weight bars horizontally prevents strain on sleeves and bearings
- Comes with wall fixings
- Stylish powder coated finish

PRODUCT CODE	ITEM	PRICE
NTS-BBWR-01	Origin Wall Mounted Weight Bar Rack	£100.79

RIGS & STORAGE

Origin Fitness Functional Training Rigs open up a whole range of opportunities for coaches to create unique and exciting workouts. While allowing trainers to be creative, they also give users the tools to challenge themselves with simple functional, callisthenics and bodyweight movements. This makes them attractive to CrossFit affiliates and gyms with a focus on functional training and conditioning circuits.

[Origin Functional Training Rigs](#)

[Origin Performance Rigs](#)

[Modular Storage Rigs](#)

FUNCTIONAL RIGS

The Origin Functional Rig combines the best features of a functional rig with some gym floor favourites to create a modular system that maximises the space available. Build in features like a half rack, rebounder, boxing station and even dual adjustable pulley to create a rig that can change the way your gym floor works for the better.

ORIGIN X-SHAPE FUNCTIONAL RIG

IF-OF-X

DIMENSIONS	STATIONS	USERS
7489mm x 3139mm x 2490mm	4	12-14

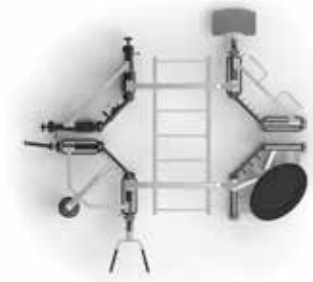

The X-Shape rig configuration is the largest configuration. It incorporates four of the five workout stations, two ladders joined by a single connector, and (also) any attachments that might be required.

There are five possible combinations without repeating any stations.

This rig offers the greatest total of available workout space, meaning this configuration allows for the most users.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7006	Origin Functional Rig - Connector
IF-OF-IZ7007	Origin Functional Rig - Stair2 Attachment
IF-OF-IZ7007	Origin Functional Rig - Stair2 Attachment

H-SHAPE RIG

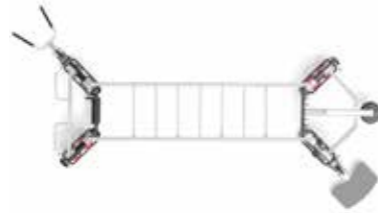

IF-OF-H

DIMENSIONS	STATIONS	USERS
4137mm x 2880mm x 2490mm	4	9-11

The H-Shape functional rig configuration consists of four workout connectors, joined by two single connectors and a ladder.

The key feature of the H-Shape functional rig is its ability to accommodate multiple users on a wide variety of stations, while not requiring the space necessary for an X shape rig. Four workout stations and a functional area in between - all confined within a small 4.2m x 2.9m area.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7015	Stair for 'H' Rig Configuration

I-SHAPE RIG

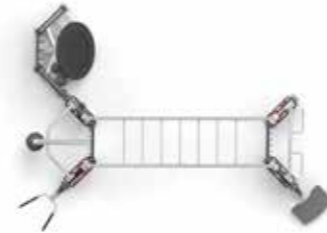

IF-OF-I

DIMENSIONS	STATIONS	USERS
4794mm x 1654mm x 2490mm	2	9-11

The I-Shape rig configuration is slim and compact and allows for a lot of outside area to be brought into play. If space is at a premium the I-Shape rig is a perfect solution.

Although there are just two workout stations, there are a multitude of different station configurations which allow for greater personalisation and customisation.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7008	Origin Functional Rig - Stair for I-Shape Rig (& L-Shape) Attachment

L-SHAPE RIG

IF-OF-L

DIMENSIONS	STATIONS	USERS
4794mm x 3250mm x 2490mm	3	8-10

The L-Shape functional rig configuration combines the best of an S-Shape & an I-Shape rig. The incorporation of a third workout station enables huge amounts of personalisation and customisation. This allows users to tailor the rig to meet specific workout needs and requirements.

The two adjacent workout stations are joined by an S-Joint Connector and the other station is joined with a ladder.

Despite not having an overhead ladder connector, the pull up handles on the stretch and DAP stations can still facilitate bodyweight and suspension training exercises.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7008	Origin Functional Rig - Stair for I-Shape Rig (& L-Shape) Attachment
IF-OF-IZ7011	Origin Functional Rig - S-Joint Attachment

O-SHAPE RIG

IF-OF-O

DIMENSIONS	STATIONS	USERS
3590mm x 3473mm x 2447mm	4	9-12

The O-Shape rig configuration is similar to the H-Shape configuration. However, it has a little more open space between stations. This means that it takes up a little more floor area, but also offers increased training areas. Whilst the H-Shape rig only allows users to walkthrough the inside in one direction, the O-Shape rig features a crossroads style design.

The four stations face away from each other, ensuring any space between can be used for training, and are all joined together by a ladder.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7014	Stair for 'O' Rig Configuration

S-SHAPE RIG

IF-OF-S

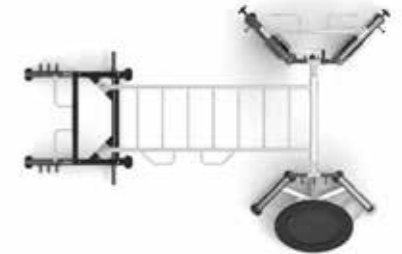

DIMENSIONS	STATIONS	USERS
1120mm x 3250mm x 2490mm	2	4-6

The S-Shape rig configuration is the most compact configuration there is. Consisting of only two stations and one S-Joint Connector, the S-Shape rig enables selections of two stations out of the five available. This means requirements can really be pinpointed and addressed in a small area.

The S-Shape rig, for its size, can be utilised in many different ways - especially when paired with the available attachments.

Note: The S-Shape rig cannot take the Half Rack station.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7011	Origin Functional Rig - S-Joint Attachment

T-SHAPE RIG

IF-OF-T

DIMENSIONS	STATIONS	USERS
4694mm x 3139mm x 2490mm	3	9-12

The T-Shape functional rig consists of three workout stations, joined by the Single Connector and a ladder. With the choice of three stations from the five available there are lots of configurations available to address whatever needs or requirements a specific facility might have.

This rig configuration gives your facility a wide range of exercise options, but maintains enough space around each station for users to work underneath the ladder and move through between the arms of the T-shape.

CODE	REQUIRED CONNECTORS
IF-OF-IZ7006	Origin Functional Rig - Connector
IF-OF-IZ7007	Origin Functional Rig - Stair for X-Shape Rig (& T-Shape) Attachment

ORIGIN FUNCTIONAL RIG - DUAL ADJUSTABLE PULLEY STATION

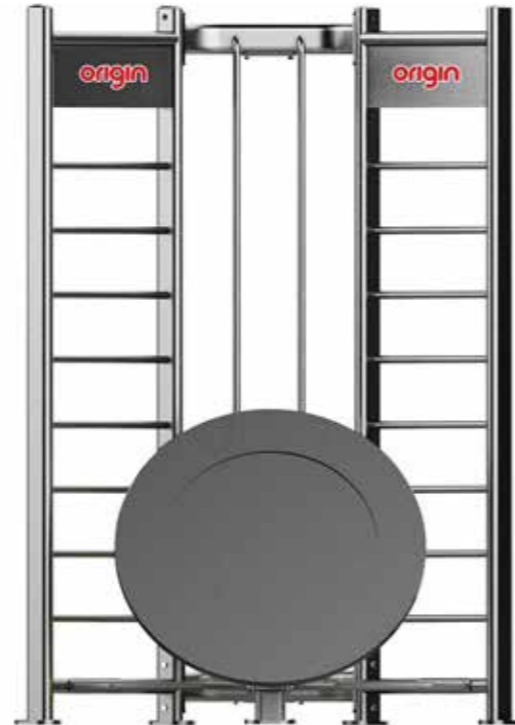

DIMENSIONS	WEIGHT	USERS
2386mm x 957mm x 2365mm	380.5kg	2

Dual Adjustable Pulley's are considered one of the most versatile pieces of fitness equipment. The cable motion system, along with its height adjustability, various cable attachment options and weight stacks provides users with an almost endless array of options. Almost all muscle groups can be targeted with dual adjustable pulleys. Cable machines also have advantages over fixed resistance machines because they bring into play stabilising muscles.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7005	Origin Functional Rig - Dual Adjustable Pulley Station	£2,886.54

ORIGIN FUNCTIONAL RIG - REBOUNDER STATION

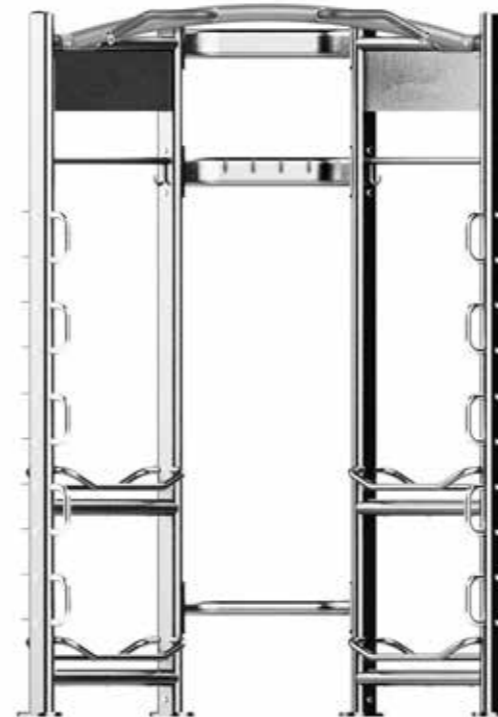

DIMENSIONS	WEIGHT	USERS
1655mm x 1072mm x 2340mm	153.6kg	2

Medicine ball and wall ball exercises play a large part in CrossFit WODs all around the world, so two of our favourite additions to functional rigs are overhead wall ball targets and ground level medicine ball rebounders. The Origin Fitness Functional Rig Rebounder Station has storage space for four medicine balls behind the rebounder.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7003	Origin Functional Rig - Rebounder Station	£1,924.03

ORIGIN FUNCTIONAL RIG - STRETCH STATION

DIMENSIONS	WEIGHT	USERS
1655mm x 1126mm x 2377mm	135.9kg	3

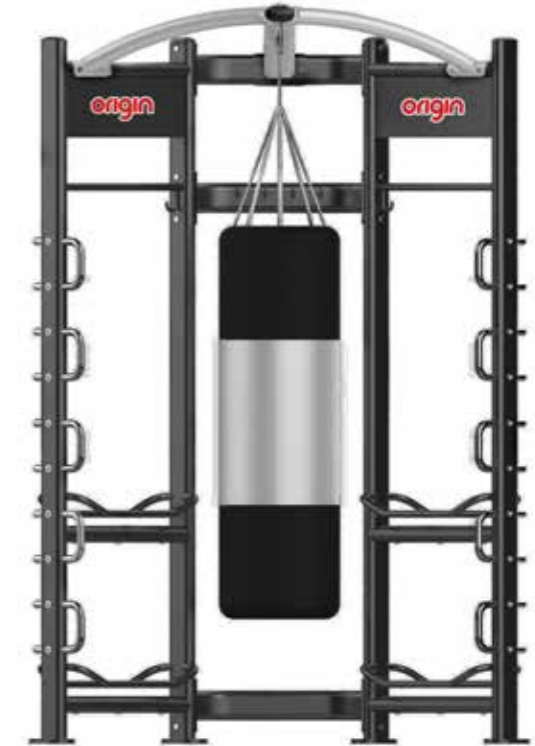

The Stretch Station is a perfect addition to the functional rig offering. The incorporated shelves can be used for storage but are also important during exercises – and the multiple different heights offer a large range of workout options.

The vertical frame loops are perfect for threading through a battling rope or anchoring this type of equipment for dynamic exercises.

The stretch station also allows the attachment of the dip and plyo platform connectors, so is one of the most versatile stations on offer.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7001	Origin Functional Rig - Stretch Station	£1,924.03

ORIGIN FUNCTIONAL RIG - BOXING STATION (EXCLUDES BOXING BAG)

DIMENSIONS	WEIGHT	USERS
1655mm x 1126mm x 2377mm	135.9kg	3

The Origin Functional Rig Boxing Station offer many storage solutions, including shelves and hooks. These storage areas can keep tidy all kinds of accessories, including boxing gloves, mitts and pads, medicine balls and kettlebells.

Boxing bag not included.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7002	Origin Functional Rig - Boxing Station	£1,924.03

ORIGIN FUNCTIONAL RIG - HALF RACK STATION

DIMENSIONS	WEIGHT	USERS
1747mm x 1409mm x 2443mm	167kg	3

The Origin Fitness Half Power Rack Station enables users to incorporate heavy lifting exercises into their functional training regime.

The Origin Fitness pivot attachments can also be incorporated into the rig at this station. The rack features 15 hook positions, spotter arms, j-hooks, storage bars and a pull up bar.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7004	Origin Functional Rig - Half Rack Station	£1,924.03

ORIGIN FUNCTIONAL RIG - CONNECTOR

DIMENSIONS	WEIGHT
1528mm x 178mm x 205mm	13.9kg

The Single Connector joins together two workout stations and also has the option of connecting the Ladder + Connector in order to incorporate more workout stations into a rig configuration.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7006	Origin Functional Rig - Connector	£143.42

STAIR FOR I-SHAPE RIG (& L-SHAPE)

DIMENSIONS	WEIGHT
3510mm x 1010mm x 206mm	43kg

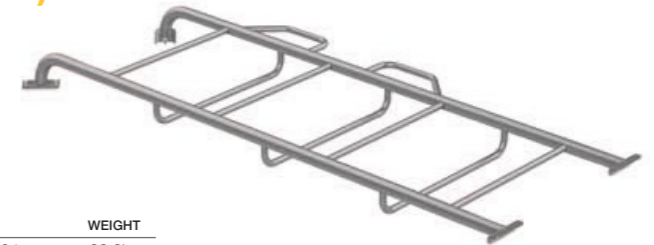

The Ladder Connector can join together two workout stations and in the L-Shape rig it will connect three stations together.

The overhead bars alternate in height, increasing the effectiveness of the user's workout.

Suspension straps and resistance based equipment can also be hung from the bars allowing for a more varied workout.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7008	Stair for I-Shape Rig (& L-Shape)	£481.22

STAIR FOR X-SHAPE RIG (& T SHAPE)

DIMENSIONS	WEIGHT
2850mm x 1117mm x 204mm	38.3kg

The Ladder + Connector allows configurations to vary in shape. On one side it will connect to one or two workout stations. On the other side it will connect to a Single Connector, which can connect directly to two more workout stations and another Ladder + Connector.

The overhead bars alternate in height, increasing the effectiveness of the user's workout.

Suspension straps and resistance based equipment can also be hung from the bars allowing for a more varied workout.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7007	Stair for X-Shape Rig (& T Shape)	£480.28

LADDER CONNECTOR FOR O-SHAPE RIG

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7014	Ladder connector for O-Shape Rig	£404.24

LADDER CONNECTOR FOR H-SHAPE RIG

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7015	Ladder connector for H-Shape Rig	£404.24

ORIGIN FUNCTIONAL RIG - DIP ATTACHMENT

DIMENSIONS	WEIGHT
940mm x 624mm x 289mm	12.6kg

The Dip Attachment connects to the vertical parts of the frame on the boxing and stretch stations.

This adds additional value and functionality of these stations, and thus to the rig itself. Users can do bodyweight dips with this attachment. They can also be made easier/harder by incorporating extra weight or power bands into the workout.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7010	Origin Functional Rig - Dip Attachment	£287.79

ORIGIN FUNCTIONAL RIG - STEP ATTACHMENT

DIMENSIONS	WEIGHT
749mm x 650mm x 289mm	16.3kg

Like the Dip Attachment, this hooks directly onto the hooks on the vertical frames of the boxing and stretch stations.

The height adjustability plays a key factor in these as they can be used as aerobic steps, or as plyometric platforms, which both benefit from differing height levels.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7009	Origin Functional Rig - Step Attachment	£384.04

ORIGIN FUNCTIONAL RIG - CORE PLATE ATTACHMENT

DIMENSIONS	WEIGHT
530.5mm x 126mm x 178mm	5.9kg

Pivot points are great core trainers and are a strength training tool that can allow coaches to teach scalable versions of key compound and Olympic movements. These can often be found built into the feet of your rig or attached close to the ground.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7012	Origin Functional Rig - Core Plate attachment	£95.29

ORIGIN FUNCTIONAL RIG - S-JOINT ATTACHMENT

DIMENSIONS	WEIGHT
178mm x 100mm x 50mm	2.6kg

The S-Joint Connector will join two workout stations adjacent to each other facing opposite directions.

This style of connector is ideal if space is at a premium as it creates a smaller rig footprint.

PRODUCT CODE	ITEM	PRICE
IF-OF-IZ7011	Origin Functional Rig - S-Joint Attachment	£47.16

SALFORD COMMUNITY CENTRE

“

From the initial meetings with Kenny and his ideas and conceptual drawing, the project was delivered on time, to budget and in such a professional manner that I would recommend Origin Fitness to any of my colleagues.

PERFORMANCE RIGS

The Origin Performance Rig is our most simple and effective functional rig solution. Every essential feature in a functional rig – this setup has it covered. The performance rig option is perfect for CrossFit boxes or spaces where weightlifting space and pull up bars are a requirement. This allows you to configure a free-standing or wall mounted system with multiple squat racks, pull up stations, wall ball targets and even dipping/step stations.

ORIGIN PERFORMANCE FUNCTIONAL RIG – FREESTANDING

The Origin Performance Rigs are simple modular constructions with endless possibilities. Simply begin with a starter cell and add more cells and attachments to fit your needs. Rigs are made to order so full customisation is available, including colour, galvanisation, branding and attachments. Galvanising a rig may increase lead time.

MODULAR STORAGE RIGS

Our modular storage rig features combine functional rig essentials with the ultimate gym equipment storage system. Keep your gym safe and tidy with an fully customisable storage system which fits most gym equipment and accessories and also work your clients hard with features like the bridge, boxing, landmine and dipping attachments.

Bridge available in 3m, 5m and 7m.

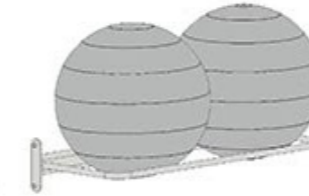

FLAT SHELF
• Can also be used to hold up to four Sandbags

MEDICINE BALL SHELF
• Will hold five Standard Medicine Balls
• Will hold five Double Grip Medicine Balls
• Will hold three Oversized Medicine Balls

MAT HANGER
• Comfortably holds 25 mats on each set of poles

GYM BALL SHELF
• Will hold up to two 75cm Gym Balls

RAMP SHELF
• Can be used to hold up to nine foam rollers

AIR BALANCE TRAINER
• Holds up to five Air Balance Trainers

RAMP SHELF
• Will hold up to ten Dumbbells

ORIGIN MODULAR STORAGE RIG

Take your gym to the next level with custom storage and a versatile functional rig – all in a simple modular solution.

Our modular storage solution combines the versatility offered by functional rigs with a tailored and equally flexible gym equipment storage system.

Four cells shown - one cell minimum required.

Contact us today to discuss your options.

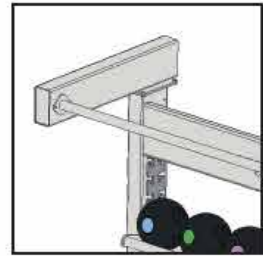

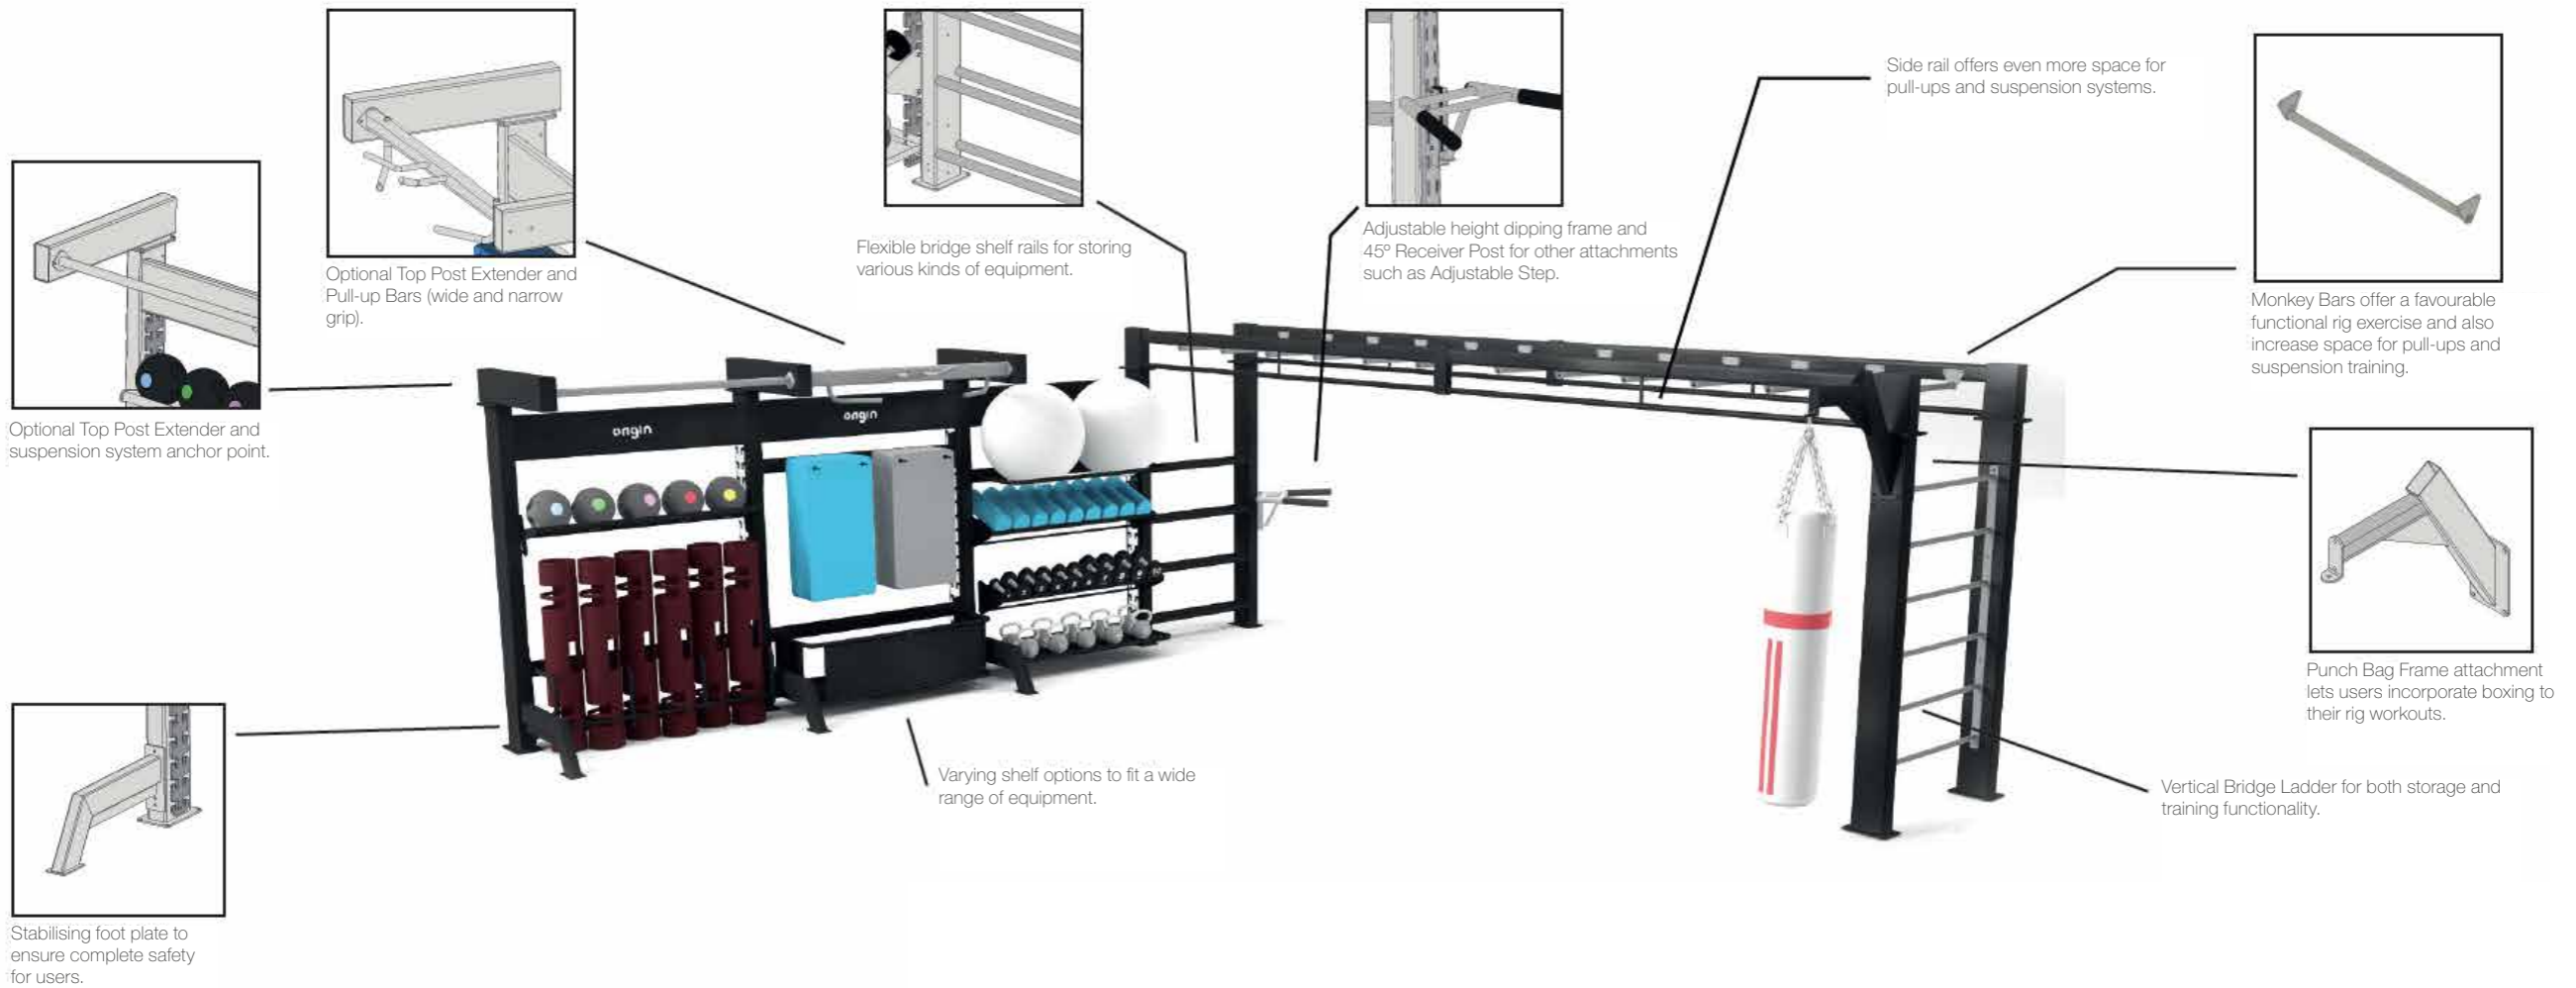

ViPR SHELF
• Comfortably holds six ViPRs

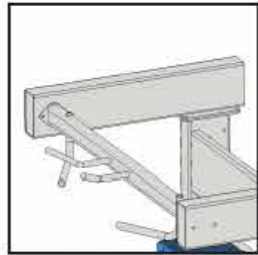

LARGE STORAGE BIN
• Used to store all kinds of small free weights & accessories

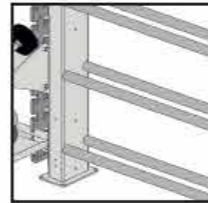

FLAT SHELF
• Will hold ten Kettlebells comfortably
• Can also be used to hold Sandbags or just as a flat shelf

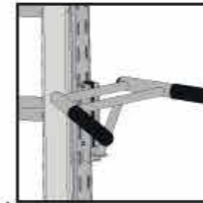

Optional Top Post Extender and suspension system anchor point.

Optional Top Post Extender and Pull-up Bars (wide and narrow grip).

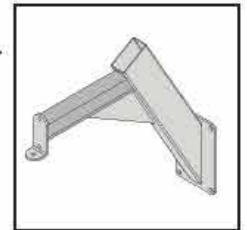

Flexible bridge shelf rails for storing various kinds of equipment.

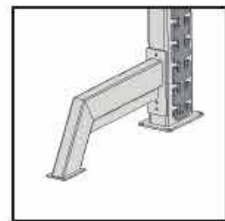

Adjustable height dipping frame and 45° Receiver Post for other attachments such as Adjustable Step.

Monkey Bars offer a favourable functional rig exercise and also increase space for pull-ups and suspension training.

Punch Bag Frame attachment lets users incorporate boxing to their rig workouts.

Stabilising foot plate to ensure complete safety for users.

Varying shelf options to fit a wide range of equipment.

Side rail offers even more space for pull-ups and suspension systems.

Vertical Bridge Ladder for both storage and training functionality.

Studio Barbell Storage

Allows each storage bay to hold up to 30 sets of studio barbell sets

Olympic Weight Plate Storage

Two methods of storing weight plates.

Origin Olympic Weight Plate Rack

Each pole is 200mm in length and can hold up to 5 bumper plates*

*Plate thicknesses will vary depending on type

Origin Olympic Weight Plate Toaster Rack

Will store up to 20 rubber bumper plates

SWEAT! GLASGOW

“

We had been working with Alan and the team at Origin Fitness since our first site and are looking forward to continuing the relationship on our future sites across the UK. Their knowledge and product range in functional training and flooring has been invaluable.

”

Jamie Mair

ORIGIN SOFT PLYO BOXES

The Soft Plyo Boxes enable powerful and dynamic plyometric exercises, without the risk of injury. The varying height options add varying degrees of difficulty to your workout.

The Origin Soft Plyo Boxes come in four varying heights which are perfect for beginners and experienced box jumpers alike. Box jumps are a great way to develop power, strength and cardio movement in any workout. What makes the Origin Soft Plyo Boxes perfect for all users is they remove the fear of injury which can be a real drawback in anyone's training.

- Great for dynamic plyometric exercises
- Soft shell reduces risk of injury
- Available in four different heights
- Stacked via secure Velcro straps
- Footprint: 89cm x 74cm

ORIGIN SQYRE

Bringing the traditional bootcamp experience into the gym environment. The Sqyre takes functional fitness to the next level.

The Origin Sqyre is a multifunctional piece of equipment that gives you a wide variety of different workouts whilst being less intimidating than a standard rubber tyre. Due to the design the Origin Sqyre is much more predictable, than standard tyres when thinking about direction and stability, this means it can be used in classes or in close vicinity to other clients.

- Suitable for deadlifts, pushing, pulling, flipping, carrying and many other exercises
- Develops overall body strength
- Durable design
- 1090mm x 1090mm x 300mm

HYPERWEAR HYPER VEST PRO

The Hyper Vest PRO weighted vest is nothing less than revolutionary. The innovative design features a unique fabric control system that hugs the body for an extremely comfortable fit, like a compression shirt, but does not restrict range of motion.

The patented design flexes in the horizontal plane but not in the vertical plane. This allows for full chest expansion for breathing while keeping the weights in place even during vigorous, multi-plane movements.

- Unisex patented design for exceptional comfort
- Breathable, odour resistant, wicking fabric
- Open side panels provide superior ventilation
- Thin profile allows for full range of motion
- Flexible side lacing for highly-adjustable fit
- Comes pre-loaded with 4.5kg (10lbs) of steel weights

PRODUCT CODE	ITEM	PRICE
HYP-50	Medium Hyper Vest Pro	£155.83
HYP-21	Large Hyper vest Pro	£155.83
HYP-23	X-Large Hyper Vest Pro	£155.83
HYP-5	XX-Large Hyper Vest Pro	£155.83
HYP-6	Booster Pack	£31.66

HYPERWEAR SANDBELL

SandBells are great for all the traditional free weight and sand bag exercises as well as countless explosive power movements such as slams, tosses, and throws. Its versatility makes it ideal for many types of training from general strength and conditioning, to endurance based circuit as well as sports performance.

- Patented design works grip, wrist and forearms
- Shifting sand provides active live weight
- Extremeley durable, high quality design
- Multiple sizes available filled and unfilled
- Safe for all ages, levels and facilities

PRODUCT CODE	ITEM	PRICE
HYP-29	1kg (2lb) Sandbell	£10.32
HYP-30	2kg (4lb) Sandbell	£13.33
HYP-31	3kg (6lb) Sandbell	£15.83

HYP-39	18kg (40lb) Sandbell	£83.32
HYP-40	23kg (50lb) Sandbell	£95.22

HYPERWEAR STEELBELL

The SteelBell is intense; there is just no other way to describe it. Constructed from extra-thick neoprene with a textured surface for improved grip and filled with steel shot, it packs a serious punch. Even though the SteelBell is twice as dense as the SandBell, it is still extremely safe for all ages and will not damage floor surfaces.

- Patented design works grip, wrist and forearms
- Shifting sand provides active live weight
- Extremeley durable, high quality design
- Multiple sizes available 2.5-90kg (5-200 lbs)
- Safe for all ages, levels and facilities

PRODUCT CODE	ITEM	PRICE

SANDBELL STORAGE CART WITH LID

This cart is constructed of a black powder-coated, heavy-duty wire frame upper cage mounted on a metal platform bottom. It includes 2 swivel & 2 rigid wheels and handle for easy portability. It also features a hinged wire lid that can be secured with padlock (not included).

With a 1,000lb capacity, the cart is able to store a large selection of SandBells or SteelBells

- Portable, 4-wheeled storage cart
- Wire cage construction on metal platform
- Attached lid for added security
- Holds up to 1000 lbs capacity
- Dimensions: 24" W x 36" L x 23" H

PRODUCT CODE	ITEM	PRICE
HYP-556	Hyperwear SandBell Storage Cart w/Lid	£317.40

HYPERWEAR SOFTBELLS

The most dynamic dumbbell on the market, the SoftBell adjustable dumbbell delivers a safe, versatile and effective workout to all users.

The SoftBell system consists of two soft neoprene weight plates that can be used individually or attached to an adjustable, easy-grip reinforced plastic handle to make a dumbbell. By attaching only one plate to the handle you can also use it similar to a kettlebell or clubbell.

- Patented 3-in-1 training system
- Soft weight plates prevent injury & damage
- Easy-grip reinforced plastic handle
- Breaks down for easy transport
- Multiple sizes from 1.4-9.1kg (3-20lb)

PRODUCT CODE	ITEM	PRICE
HYP-1501	1.4kg (3lb) Softbell	£19.84
HYP-1502	2.7kg (6lb) Softbell	£31.74
HYP-1503	4.1kg (9lb Softbell)	£39.68
HYP-1504	5.4kg (12lb) Softbell	£47.61
HYP-1506	6.8kg (15lb) Softbell	£55.55
HYP-1507	9.1kg (20lb) Softbell	£69.83

HYPERWEAR SANDROPE

The Sandrope is a 3.05m (10ft) long, 76.2mm (3") diameter neoprene tube filled with either 15 lbs or 30 lbs of sand. An anchor and collar are included (at no additional charge) so it can be used anchored like a traditional battle rope or free standing.

The patent pending design of the SandRope makes it as tough as traditional battling ropes, but without the shedding fibres. The 3.05m (10ft) Sandropes (14kg) are also as heavy as a 38.1mm diameter 15.2m (50ft) battle rope.

- Patented high quality, durable design
- Can be used anchored or unanchored
- Limited space needed
- Sand provides added resistance
- Great for individual or group training

PRODUCT CODE	ITEM	PRICE
HYP-801	7kg (15lb) Sandrope	£146.52
HYP-806	14kg (30lb) Sandrope	£128.33

KETTLEBELLS

Kettlebell classes are some of the most popular in gyms today, which is why it is important to us that you get the right product for you or your classes. The kettlebell workout is also one which has grown in popularity within the home sector. After learning the basics with an instructor or PT, we understand many people like to continue working with kettlebells in the privacy of their own home. There are five different types of kettlebells in the Origin range – cast iron, vinyl coated, rubber, urethane and competition.

COMPETITION KETTLEBELLS

Competition kettlebells are a standard size and shape. Ideal for those who have used kettlebells often and have developed their technique. The wide base is perfect for performing floor based exercises. Hollow steel offers the highest quality competition kettlebells available.

- Colour coded to differentiate weights
- High quality steel material
- Weights from 2kg – 32kg

NTS-CKB-32	32kg	£115.49

RUBBER KETTLEBELLS

Not only does rubber coating the body of a kettlebell make the product more attractive, it also protects both the metal core and the floor from damage. Coloured coatings are useful for weight differentiation in gyms.

- Mid range kettlebells
- Rubber offers a more durable and long lasting kettlebell
- Attractive colour scheme
- Weight ranges from 4kg – 32kg

ORIGIN DRAG SLED

The Origin Drag Sled is a great tool for strength and conditioning purposes. Whilst primarily targeting legs, arms and hip strength, the Origin Drag Sled also offers a complete body workout and can be used in High-Intensity Interval Training to really push your body to its limits.

The durable design will withstand full commercial usage. The central plate loading point will hold all Olympic sized plates and keeps the sled balanced.

- Rope hoop allows sled to be pulled or dragged
- Easily transportable and suitable for any terrain
- Attach a harness, battle rope or pull rope to the hoop
- 140kg load capacity
- Chamfered edges prevents the sled catching and damaging turf

PRODUCT CODE	ITEM	PRICE
OF-2710	Origin Drag Sled	£129.99

ORIGIN PROWLER

The Prowler sled can be used either indoor or outdoor, on a variety of different surfaces. Sled pushing is one of the most effective and efficient exercises for a full body workout.

The prowler comes with two detachable vertical poles which allow users to adjust their centre of gravity to target different muscle groups.

The front of the prowler has two separate horizontal pole sets which allows users to push back along a track without turning the sled. Users can also hook a harness or strap around these poles and pull the sled, allowing for a more versatile workout.

PRODUCT CODE	ITEM	PRICE
OF-2715	Origin Prowler	£345.99

ORIGIN PERFORMANCE DOG SLED

The Origin Performance Dog Sled is the perfect tool for sled work in all types of facilities. The full-height handles on both sides allow quick change-overs between multiple users or fast changes in the direction it's being pushed – great where space is limited. The double sided handles even allow multiple users to push against each other at the same time.

Our Performance Dog Sled also comes with a useful rope attachment that makes it perfect for pulling using a battle rope or even attaching a harness to the user.

PRODUCT CODE	ITEM	PRICE
OF-2720	Origin Performance Dog Sled	£649.99

THE TANK

The TANK™ is a must-have product in the pursuit to build the perfect athlete. If you are looking for a complete workout then this exercise sled is perfect for you. With three different difficulty levels, all users are able to challenge themselves every time they use the TANK™.

- 4 Pneumatic Tyres
- Variable magnetic resistance
- Compatible with all surfaces
- Bi-directional - the resistance works both pushing & pulling. No need to turn the tank around.
- Two weight plate holders

PRODUCT CODE	ITEM	PRICE
MT3-XTT1	Torque Tank	£1,495.00

ORIGIN WEIGHTED VESTS

The Origin Weighted Vest is available in three different weight options; 10kg, 15kg and 20kg. Each vest is designed to fit all users with a single size design.

Small pockets of sandbags distributed evenly throughout the vest allow the Origin Weighted Vest to be worn comfortably and securely while avoiding sagging and tearing of material over time. This even weight distribution allows the wearer to perform movements more naturally without being pulled off balance.

A pull-over design makes it easy to get in and out of the vest, while the Velcro strap allows the user to tighten and secure the vest to fit perfectly.

- Available in three different weight options
- Evenly distributed weighted sections
- Individual weights can be removed
- Comfortable fit - one size fits all
- Easily fastened with velcro support

PRODUCT CODE	ITEM	PRICE
NTS-WTDVST-10	Origin Weighted Vest 10kg	£81.36

FLUIDITY BALLET BARRE

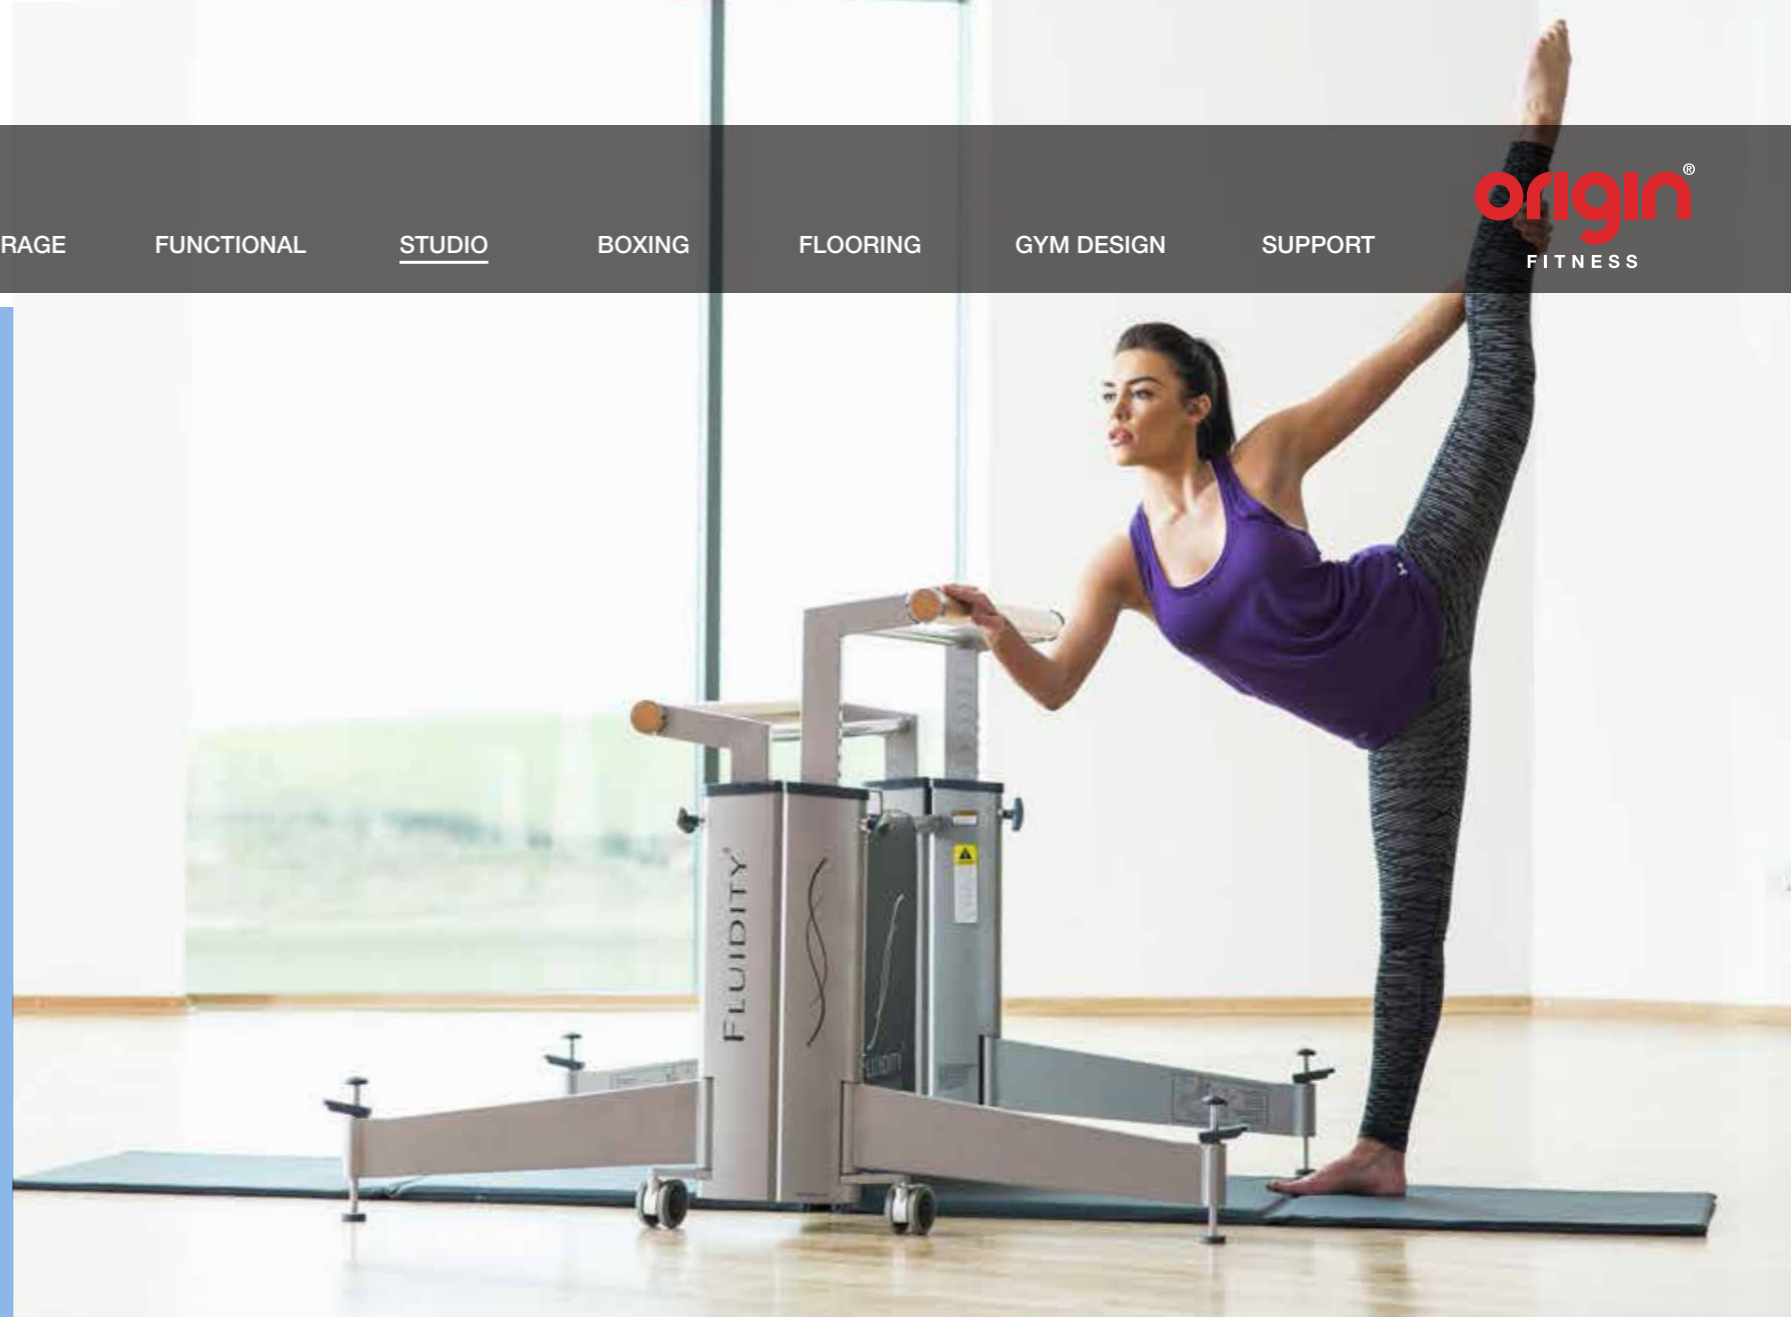

The Fluidity Barre is the world's first height-adjustable ballet barre to feature the strength and rigidity of a wall-mounted barre in a completely portable, freestanding unit. Its patented design allows you to work against the resistance of your own body weight and the barre in all directions – the key to developing whole-body strength and flexibility and the long, lean lines of a dancer's body.

Features:

- Dual user design maximizes floor space
- Luxurious custom turned solid ash barre
- Independently adjustable barre height for dual users
- Rubberized over-moulding on all touch points to prevent slippage during usage
- Cushioned backboard simulates working against a wall
- Easy "push-push" mechanism to lock and release leg
- 4x swivel wheels for ultimate portability
- Legs stow securely in place during transport

Specification:

- Structural steel frame members
- Welded and mechanically fastened construction for unit stability
- Lightweight aluminum alloy columns with high strength to weight ratio
- Robust and corrosion resistant powder coat finish resists flaking and chipping
- Metallic silver coloration
- High strength, easily cleanable vinyl mat covering
- High density internal mat padding
- Barre height adjustability from 32 inches to 43 inches
- Maximum user weight 300 lbs

FLOORING

Fitness flooring is a speciality not dissimilar to the specification of the free weights, cardio or functional zone and must be considered as part of the early planning of a space when identifying each zone within the gym.

Gym flooring is a crucial part of any successful gym fit out and is often not given the necessary consideration. Fitness flooring is a speciality like the specification of the free weights, cardio or functional zone and needs to be part of the early planning of the space when considering the space allocation for each zone within the gym.

Origin flooring products are versatile and can be used in a variety of different environments:

- Free Weights
- Strength and Conditioning
- Cardiovascular
- Functional
- Studio

GYM DESIGN

Origin Fitness offers high quality, bespoke gym design solutions. We apply our gym design principles across the board, from personal trainer studios to independent clubs, local authorities to hotels, and sports clubs to CrossFit boxes.

With a wealth of experience, we are able to call upon different experts from within our team depending on your specific requirements. This allows us to provide an individually tailored proposal and an exceptional gym design service from start to finish.

[Design Service](#)

[Case Studies](#)

Nuffield Health, Club Baltimore

“EACH PROJECT IS TREATED ON AN INDIVIDUAL BASIS. THE CLIENTS WILL DISCUSS THE BRIEF AND THE TYPE OF GYM THEY HAVE OR ARE THINKING OF HAVING”

To begin with we'll have an initial consultation to help us understand your objectives. The design process starts with a complete understanding of what type of facility you want to create, the USPs that your business is built upon and an even better understanding of the target customer who's going to use the space.

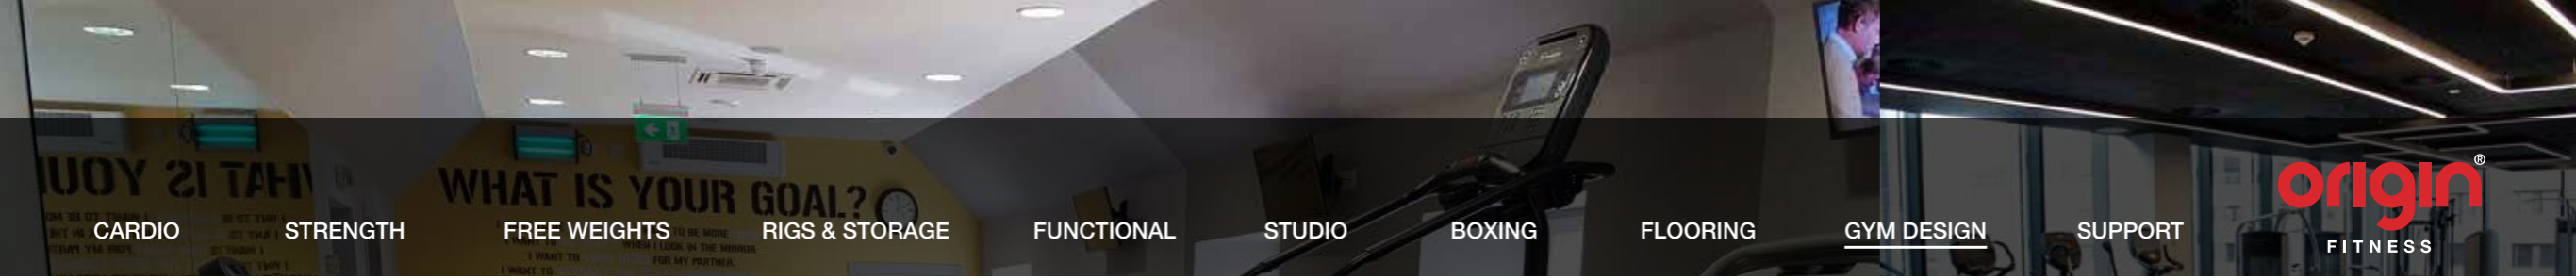

In order to create the perfect training space our experienced designers will advise on layout, interiors, flooring and finishes, as well as guiding you to your final choice in fitness equipment.

We can help you visualise your project using 3D designs and 360° video walkthroughs using the latest software and VR headsets.

Once you're happy with plans we'll put the wheels in motion to have our team of experts prepare the site for installation, train your staff on equipment and help put together marketing plans all before the final installation.

Equipment and Zoning

- Understanding the activity that goes on at a client facility helps us to create zoned layouts which maximise the use of every square foot, ensuring we create a safe, friendly and exciting gym environment.
- We will recommend equipment from our industry leading range of brands for these zones based on the type of gym user, type of training activity and budget.

Flooring

- Flooring is crucial, for ensuring the longevity of a gym’s equipment and protecting the fabric of your building.
- As well as functionality being a huge driver in flooring choice, the design element has become increasingly important with custom branding, designs, colours and markings being featured in many of our gym designs.

Interior Design

- The look and feel of a gym can be influenced greatly by the interior design, mirrors, artwork and use of lighting to create the desired ambience.
- One popular service Origin Fitness offers is the design and creation of full wall graphics and wall vinyls such as Tour de France images in cycling studios and motivational quotes on PT studio mirrors.

Branding and Signage

- Ensuring the different zones within a gym are clearly signposted and making clear the rules and requirements for both safe and friendly facility use, can go a long way in creating the kind of gym you want.
- As well as gym signage, Origin Fitness can provide workout posters to guide members around their workout when a trainer is not immediately available.

Design and Planning

- From the initial meeting, Origin Fitness will appoint a dedicated sales manager who will listen and understand your vision while offering advice and guidance. We will then recommend the products and services which you can use to bring this vision to life.
- To help visualise the facility, we will create 2D plans and 3D designs to aid your decision making. We can even create 3D walk through videos to help with your project proposals and pre-launch promotion.

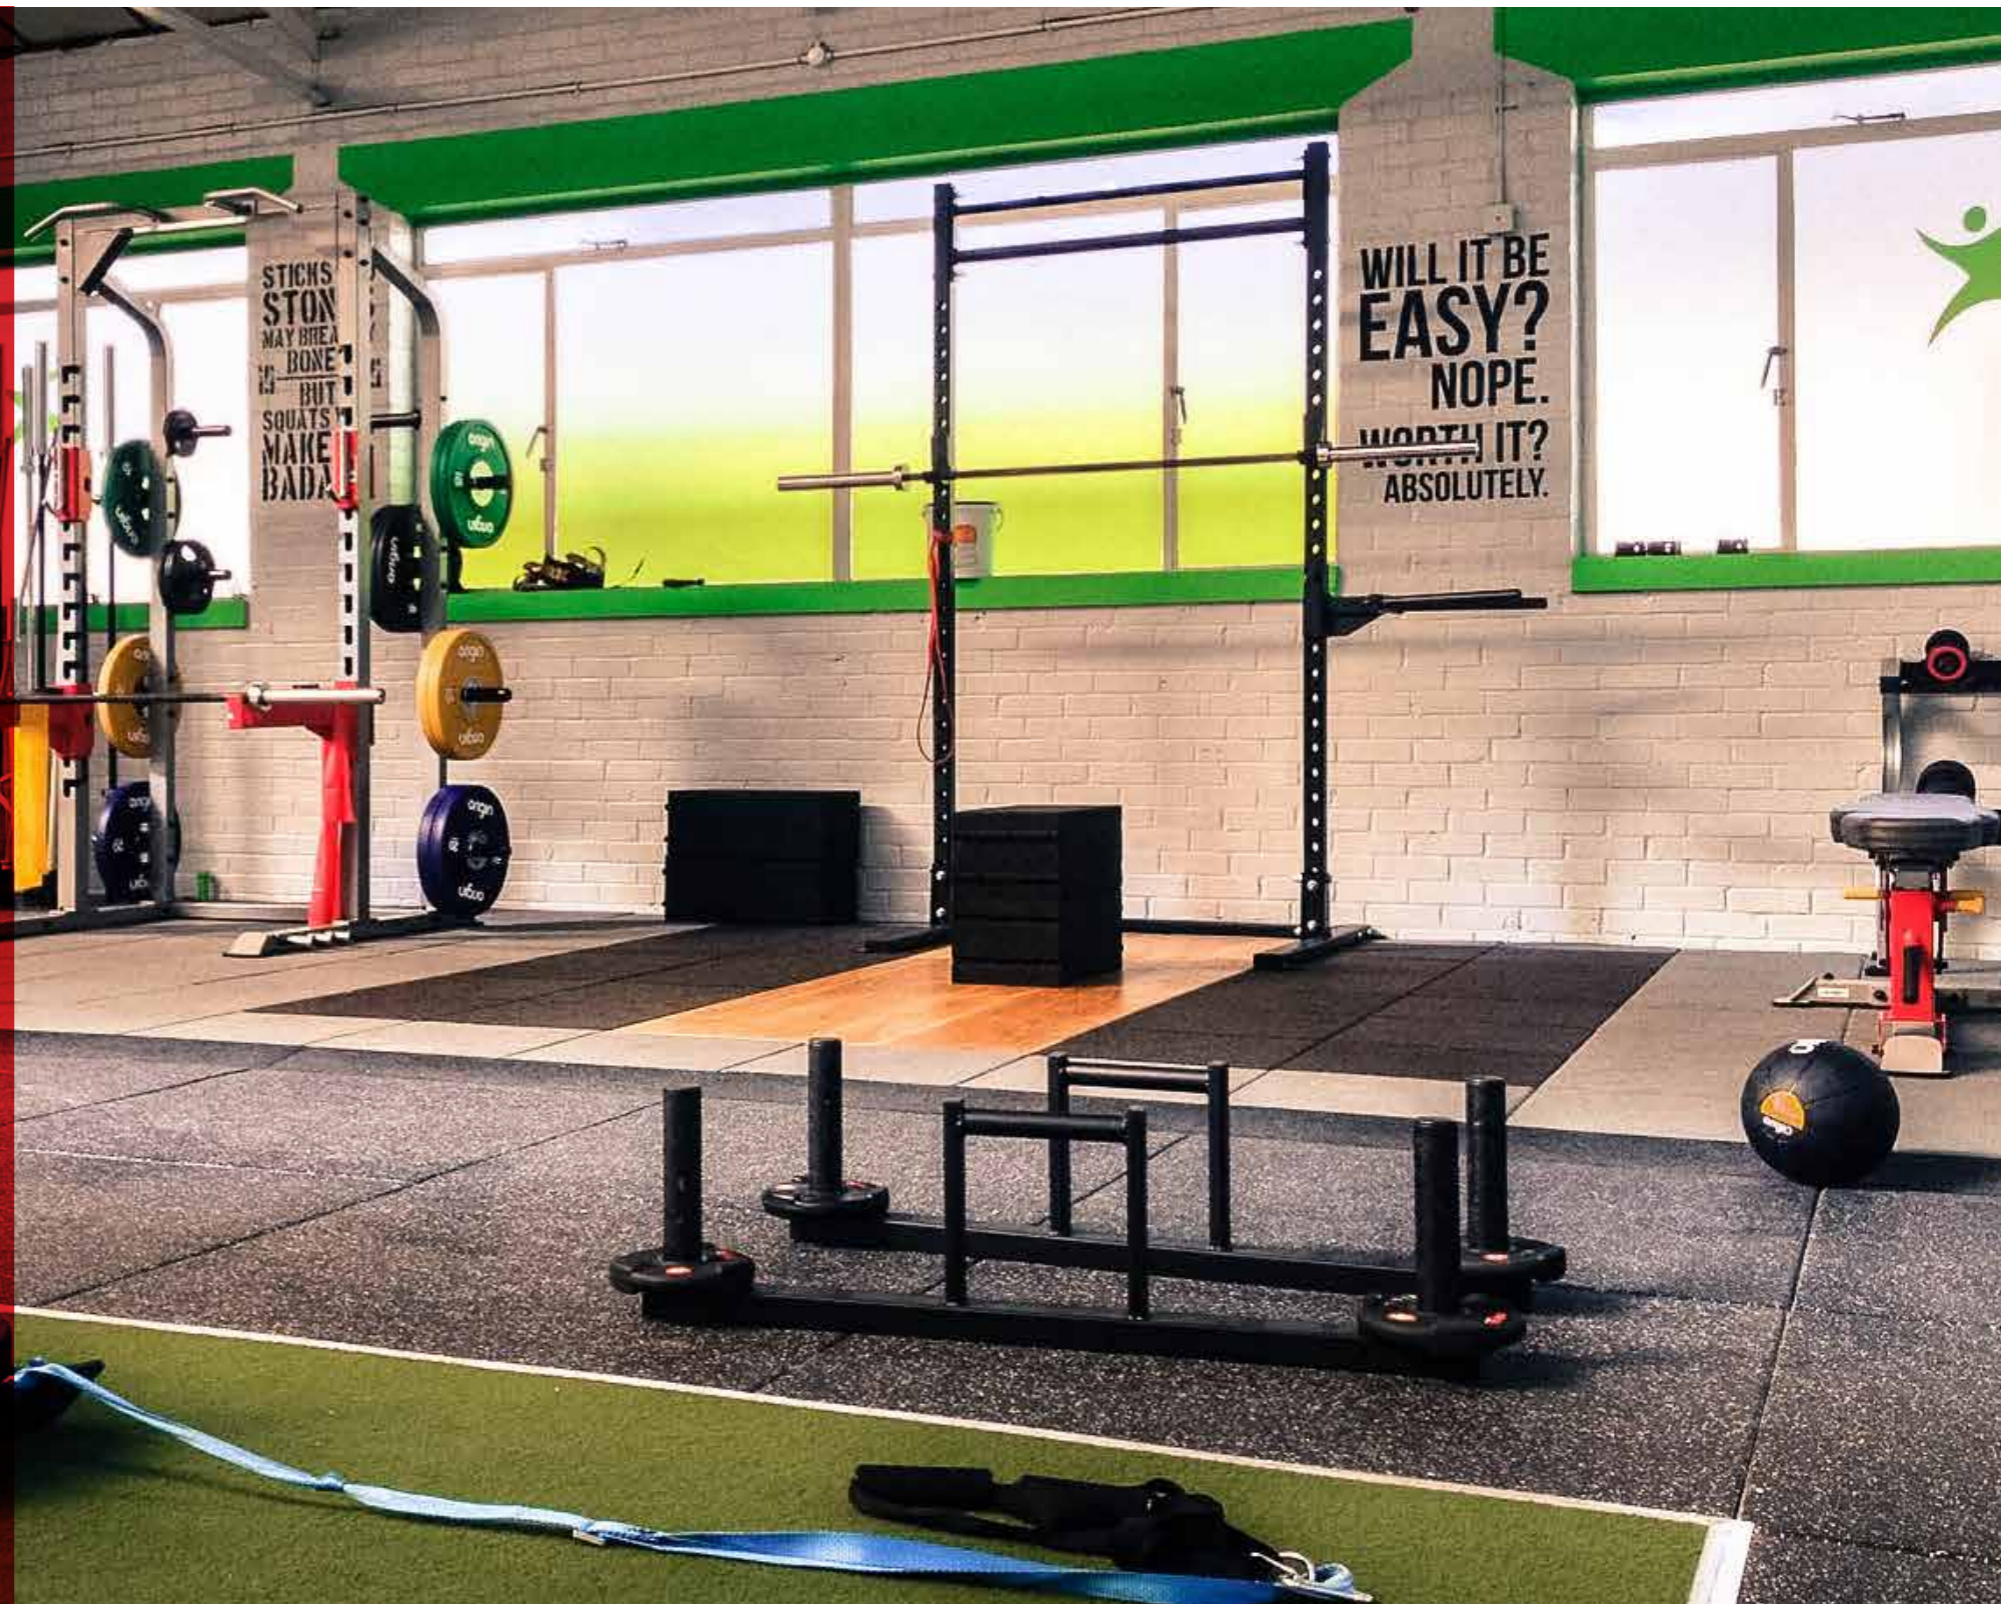

THE FITNESS EXPERTS HIGH WYCOMBE

“

Over the past two years we've worked closely with Origin Fitness to develop the design and plan for our most recent facility in High Wycombe. Origin Fitness set themselves apart from the competition by giving us an incredibly personal and supportive service right from the initial planning and design stage. They approached the project with the same patience and attention-to-detail that we did ourselves. Being able to work with a single point of contact to deliver all aspects of the project from flooring to equipment supply made things very easy for us. We'd definitely be happy to recommend Origin Fitness and we look forward to working with them again in future.

Tom Edwards
The Fitness Experts

”

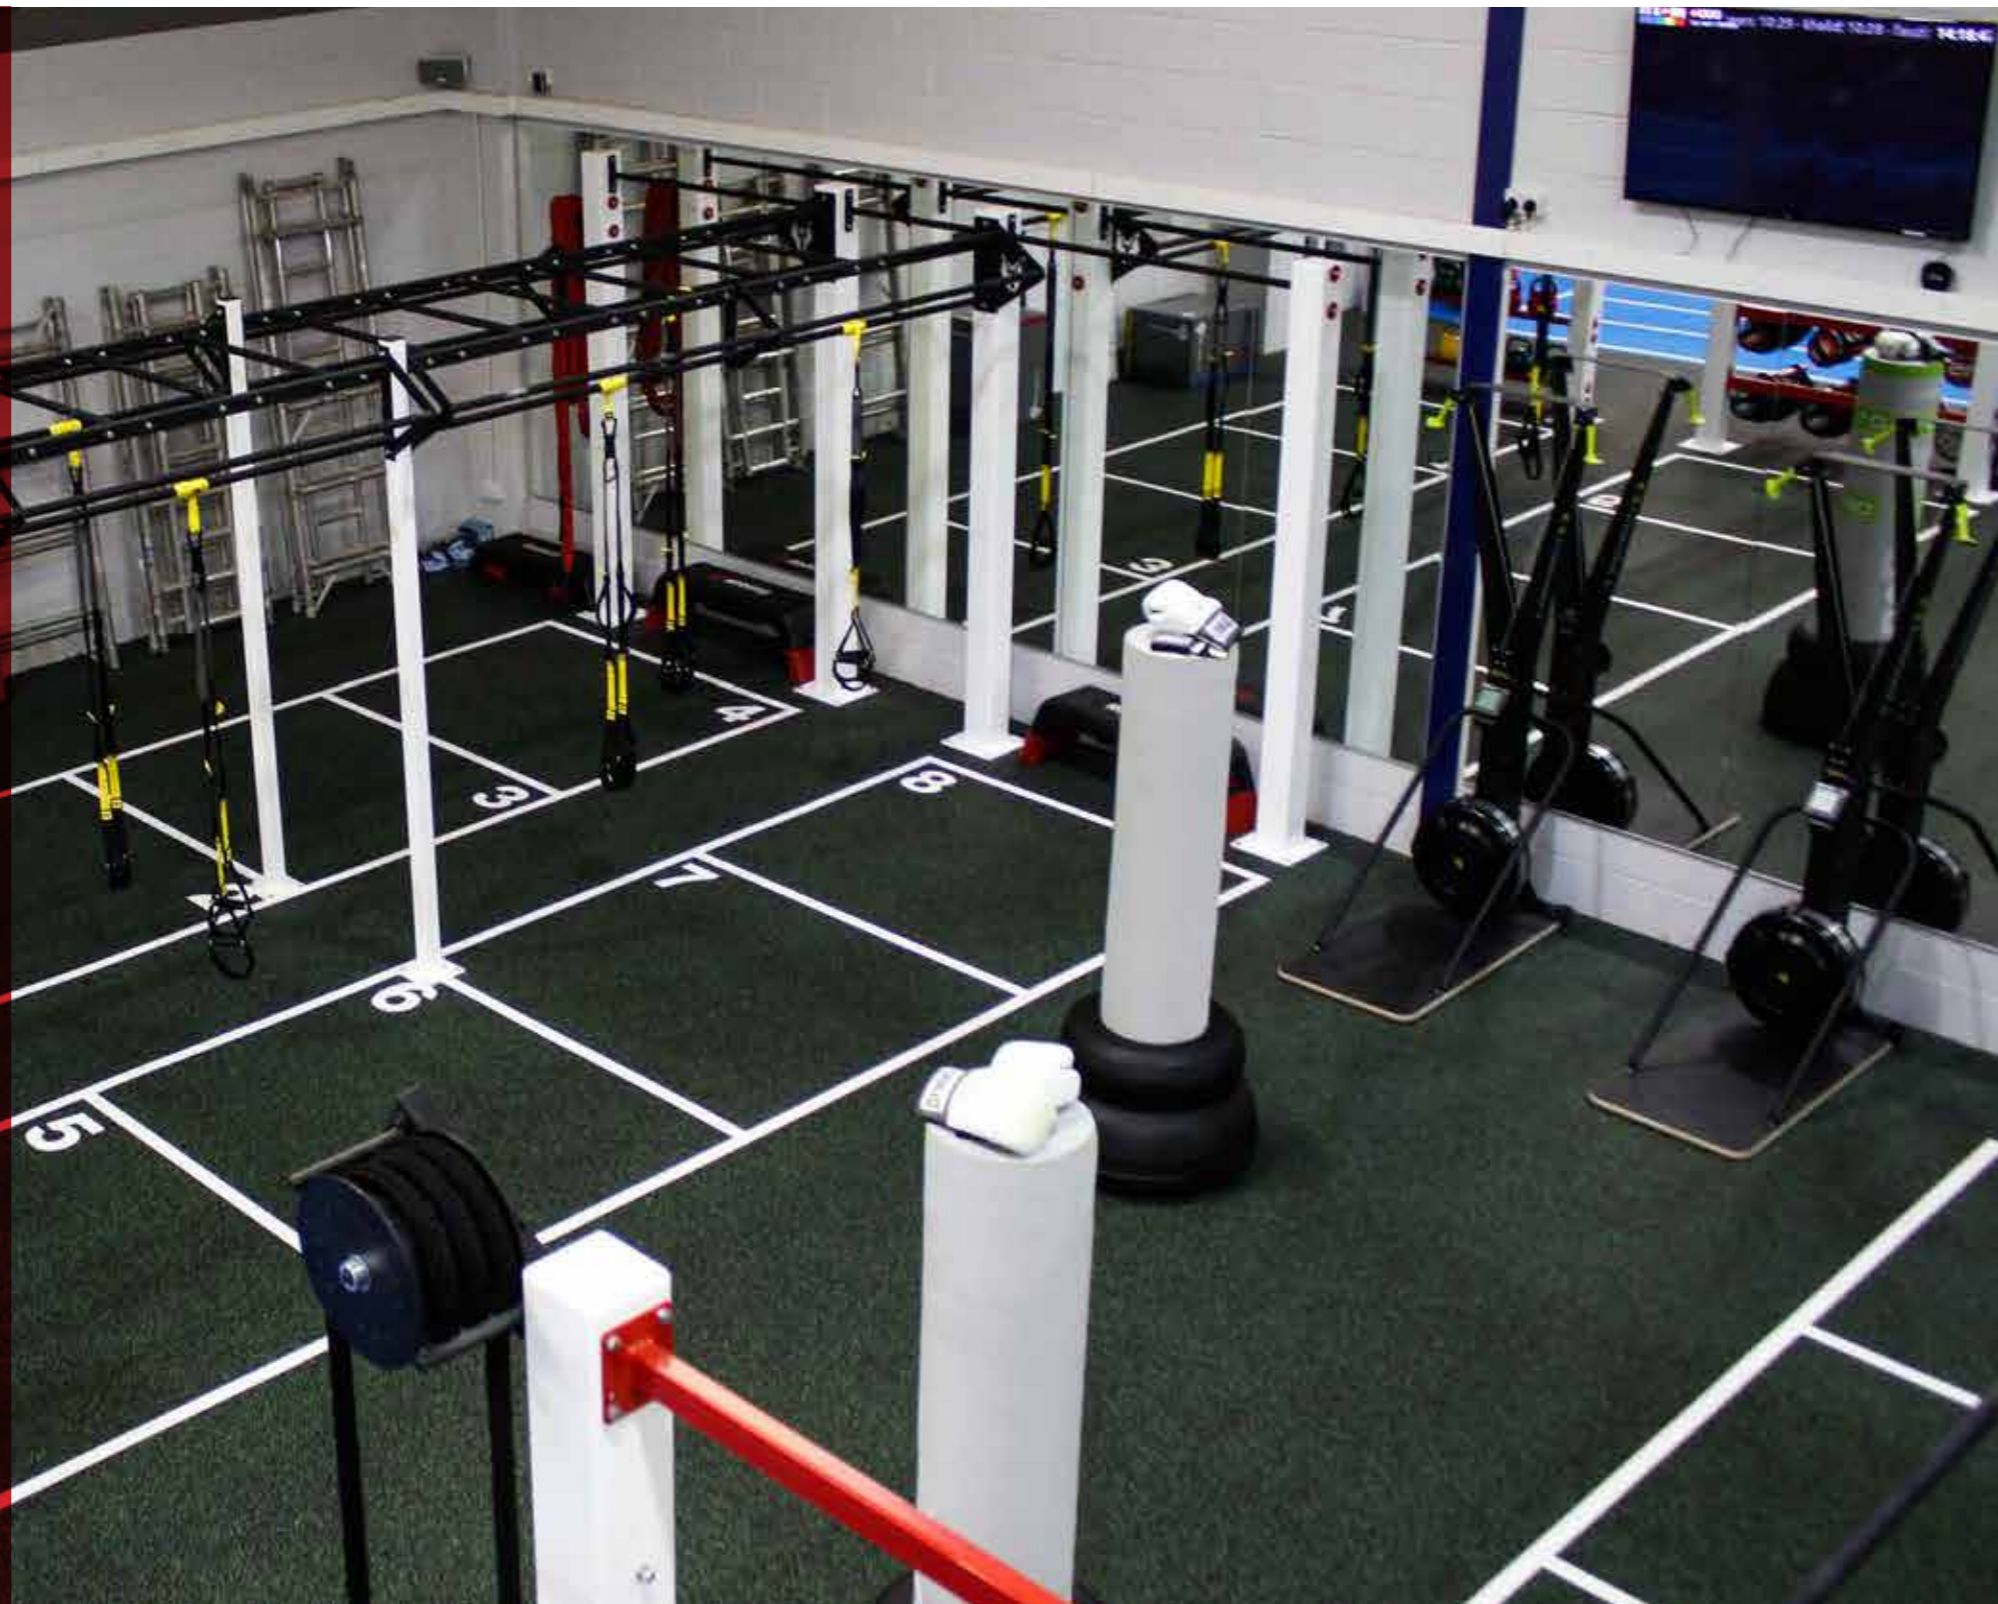

GYMBO'S HEALTH AND FITNESS

When first embarking on this project, I could not have predicted the huge role Origin Fitness ended up playing in the completion of my facility. Unlike some of their other customers, I had a very clear vision of what I wanted to achieve, and Matt worked with me to make this vision a reality. Origin Fitness provided all the equipment at a very competitive price, and I am very pleased with the work they have done. I would definitely recommend them to anyone looking to set up a new facility.

James Rivers
Owner

NORTH LANARKSHIRE LEISURE WISHAW

“

We are delighted to be working in partnership with Origin Fitness to roll out our next generation of gym installations that will help us remain at the forefront of the health and fitness sector. Origin Fitness understands that the changing patterns of public demand mean industry trends are moving towards new and traditional functional and resistance training methods.

WHO WE WORK WITH

SUPPORT

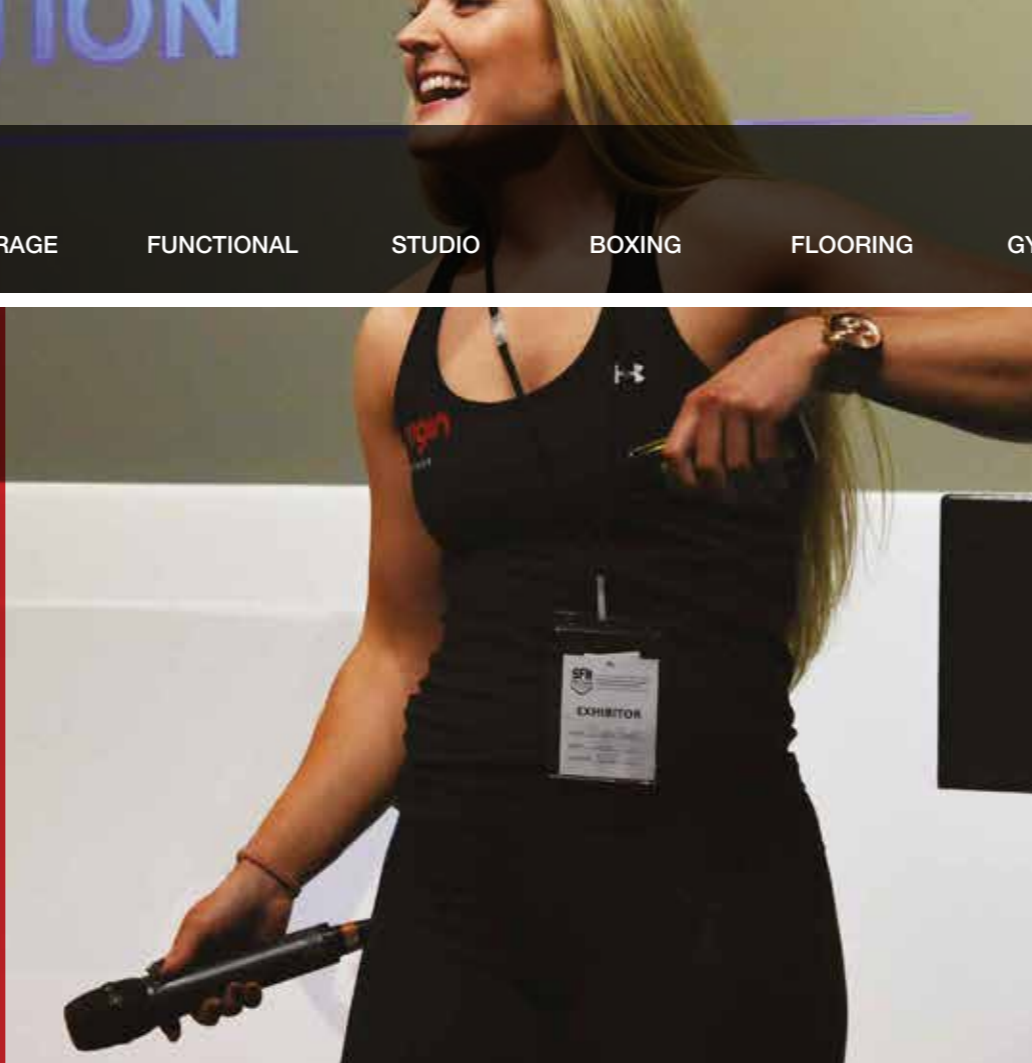

Origin Fitness is proud to offer customers a complete service which extends beyond gym design and equipment supply. Our goal is to help your fitness business be as successful as possible. In order to achieve this we have in-house teams dedicated to supporting your business with training and education, equipment servicing and maintenance as well as business support and marketing services.

Training

Marketing

Service

TRAINING

How can we help you?

The Training Academy offers a comprehensive range of course types and delivery formats to ensure our wide range of courses are accessible to everyone. Our Edinburgh venue is quickly becoming a hub for fitness education in Scotland with courses running almost every week.

Tailored to your needs

Our courses can accommodate individuals looking to develop their knowledge, as well as leisure industry operators looking to enrol a group of staff on a course that will support and enhance their service and standard of training.

In-house Training

For larger operators, in-house training courses can be delivered bespoke to meet your service needs and goals. We can bring along specific equipment required on the day and be ready to deliver high quality courses for your staff and team.

Applicable Knowledge

All our courses are developed to ensure that attendees can start returning the training investment from day one. Each course is accompanied by the appropriate manuals, teaching materials and downloads.

Use Our First Class Facilities

The main gym within our Training Academy is equipped to the highest standard to make sure the learning experience you receive as a course participant is not just good, but exceptional.

The Training Academy replicates the areas you will find in any commercial gym; the free weights zone, fixed resistance machines, cycling studio, cardio zone, a fully equipped functional training rig and flexible studio space. This, combined with two seminar rooms, screens and projectors, makes it the ideal venue for courses and workshops.

Education Partnerships

For 2017 we are pleased to announce a partnership with British Weightlifting (BWL). The partnership between us is one that BWL feels will ensure coaching and education products are delivered to a very high standard across a whole range of industry providers. With a variety of courses available throughout the year for all standards, we can be sure to meet the needs of our customers across all sectors.

MARKETING

Origin Fitness is committed to working in partnership with our customers and we are proud to have a strong focus on helping our clients grow, develop and succeed in providing the best service possible to more members than ever.

Origin's marketing support services can be distinguished into two areas:

Consultancy

Our consultancy services include gym design, business planning, sales and marketing strategies, service delivery training and campaign planning. To deliver these we use a carefully selected team of industry experts whose extensive experience is sure to add value to your business.

Branding & Design

Our branding and design services include custom branding on equipment, signage, interiors and other marketing materials. Using our in-house team and expert partners, we can provide solutions to meet all of your branding and design requirements.

SERVICE

Origin Fitness is proud to provide service through our own qualified service engineers who work in partnership with an extensive network of independent engineers on behalf of the brands we supply. With engineers across the UK the company can offer support seven days a week, enabling a guaranteed 48 hour response time to any service request. At Origin Fitness we are committed to maintaining an exceptional level of service across all areas of our operations. This is why we are the only UK fitness equipment company to invest in three internationally recognised accreditations; ISO9001 (Quality Management Systems), ISO14001 (Environmental Management Systems) and ISO18001 (Occupational Health and Safety Management).

Our in house team of engineers and technicians look after installations, equipment servicing, maintenance and refurbishment. We have a central warehouse located in Edinburgh, which holds parts at all times for current ranges and also for the previous two generations of each piece of equipment we sell. An inventory of parts is also kept with the service engineers which allows for a more effective call out response and also higher first time fix rates.

Origin Fitness will ensure an engineer is on site within 48 business hours of a fault being logged. We have an average response time within 24 hours and boast a first time fix rate of 98%.
